#### ABSTRACT

The Islands can be said to be a source of future growth with high potential for use as marine resources, historical and cultural values, and territorial important assets. Accordingly, Jeollanamdo has established and is promoting the 10-year plan (2015-2024) for cultivating the “Islands that people hope to visit” in order to develop resources for comparative advantage and to discover contents unique in the islands. In particular, the Korea Island Promotion Agency was opened in Mokpo to conduct systematic research and research on the islands and to promote policy establishment in 2021.

Geumdangdo in Wando and Geumhodo in Jindo were selected as part of the “Islands that people hope to visit” project in 2021, and research was carried out to find the comparative advantages of the islands. As a result of reviewing the results that have been promoted since
